Making the right choice

Questions you should be asking yourself:

- In the years since I've had my HSA, in how many of them did I reach my deductible?
- What kind of ongoing medical expenses & prescription drug costs am I likely to have?
- Based on last year's (personal and family) expenses, would Option 1, 2 or 3 have made more sense?

Health Savings Accounts

HSA Limitations

- Only available with tax qualified high deductible health plan (HDHP)
- May not contribute to an HSA if enrolled in other coverage that is not a tax-qualified HDHP (including Medicare or a medical flexible spending account (FSA))
- May not contribute to an HSA if claimed as a dependent on someone else's tax return

HSA Limitations cont.

- Annual contribution limits for 2023 of \$3,850 for single person coverage and \$7,750 for two person or family coverage
- \$1,000 catch up allowed annually for account holders 55 years or older
- HSA dollars may not be used to pay medical expenses incurred prior to enrolling in HDHP

HSA Penalties

- Improper use of funds before retirement (Medicare-eligible age): pay taxes on dollars used plus a 20% penalty
- Contribution beyond IRS maximums: pay taxes on excess contributions plus a 10% penalty
- Use of funds for non-qualified expenses after reaching Medicare-eligible age: pay taxes on funds used without additional penalty

 - Out-of-state dependents need to inform PH Customer Service they are out of state.

DIABETES PREVENTION WITH OMADA

What is DPP?

The National Diabetes Prevention Program (DPP) is an evidence-based structured lifestyle change program for adults over age 18. Through 16 weekly sessions and 6 monthly sessions, participants learn to make lifestyle changes to reduce their risk for type 2 diabetes. A trained lifestyle coach works with groups of participants to:

- Lose 5-7% of their starting body weight and adopt healthy eating habits
- Increase your weekly exercise to at least 150 minutes per week
- Learn to recognize and overcome barriers to healthy eating and physical activity
- Lower medication usage
- Decrease risk for other chronic disease conditions like heart disease, stroke, and kidney disease

Who's eligible?

If you're a Priority Health member with a body mass index (BMI) over 25 and you're diagnosed with pre-diabetes or at-risk for developing diabetes, you're eligible for this prevention program.

1 in 3 adults have prediabetes or are at risk to develop type 2 diabetes

Reduce your risk of developing type 2 diabetes by up to
